BOSTON CON. IS KING OF CAMP

Samuel Newhouse Gives Out Official Statement After Inspection of Property.

SHARES CAN EARN EIGHT PER CENT AT \$100 EACH

Millions of Tons of Low-Grade Copper Ore Are Now Opened Up.

"The Boston Consolidated is the biggest mine in Bingham. The company can, after the projected plans for our mills and the American Smelting plant are completed, earn an 8 per cent divi-dent on the shares at \$100. This is the unqualified statement of Hon. Samuel Newhouse, head of the Boston Consolidated, and numerous other Utah and Colorado mining enterprises, who, since his arrival two days ago, has been going over the situation at Bingham with his

Marvelous Developments.

Marvelous Developments.

'I knew that there had recently been some great developments in the Boston Consolidated, said Mr. Newhouse last night upon his return from the camp, but I did not desire to make any announcement until I made a personal inspection. In the Penbody tunnel workings we have gone fifty-one feet into a body of are that will average 2 per cent copper. In the past six months in the two Ben Hur tunnels and the Montpeller tunnel we have opened not less than 25,000,000 tons on the porphyry side that will average 2 per cent copper. This is the information given to me directly by Manager L. S. Cates."

Plans Rapidly Maturing.

As soon as our rapidly-maturing plans for the erection of mills and the shipment of ores to the smelter now in course of erection by the American Smelting and Refining company are perfected, I am confident that our company can earn an a per cent dividend on the shares at \$100.

Deposits Unlimited.

"With the great extent of our copper-bearing porphyry deposits these divi-dends should, and I believe will, be paid for an indefinite period. Besides this great body of copper in the porphyry we have opened up ready for extraction a body of sulphide copper ore from which we are now shipping 250 tous per day and which will be increased to 500 tons when the new smelter is ready to re-ceive it.

Will Yield Big Profits.

"The sulphide ore alone will yield a profit of \$150,000 per month when the new smeller is ready for operation May I. I therefore advise our shareholders to keep their shares as an investment rather than sell them now at a price less than their actual value.

"SAMUEL NEWHOUSE."

Of Great Significance.

Of Great Significance.

This statement, coming as it does from one of the ablest mining operators of the country, from one who is always sure of his ground when he makes an assertion, has a significance not easily comprehended. To the shareholders on the Boston Consolidated it carries an assurance of dividends that should yearly amount to more than the price of the shares two months ago. To the thousands in Utah and elsewhere who have intereste in Blingham it furnishes another irrefutable argument for the greatness of that camp and warrants the statement that within two or three years the present enormous output of the district will be more than doubled.

ALTA BUSY CAMP

P. J. Donohue Likes the Looks of These Diggings.

The entire camp of Alta is in fine shape, soys P. J. Donohue, who has just returned from a day in those diggings. The Columbus Consolidated and the Continental Alta are in condition for a splendid winter's campaign, the Albion is increasing its tonnage, while preparations are under way for the resumption of work on the Peruvian, now under bond to Eastern operators.

Will Be Ready on Time.

General Manager R. W. Foster of the Sevier Consolidated at Gold Mountain, who left for the property last night, reports fine progress in the installation of the machinery for the company's new plant. He expects to have the mill in commission by Christmas, a few days shead of the scheduled time. The equipment is now being hurried down as fast as possible by Fred Richmond, head of the machinery department of the Sait Lake Hardware company.

Hornblower & Weeks Copper Letter. BOSTON. Nov. 2.—Boston Consolidated, while not quite so active as yesterday, gained a little in the early trading. The buying is still of the very best character, being by the same interests who have been buyers all the way up from Sc. Utah was very strong and in demand, with little stock in sight and would look cheap at the present figures when compared with other copper shares. Bingham was another feature.

Nearing the Ore.

Favorable indications of approaching the ore body are reported by Secretary Miller of the West Quincy of Park City. The drift runs from the 700 level of the Little Bell and will encounter the West Quincy shaft at a depth of nearly 1100 feet. The vein matter is now heavily copper-stained and important disclosures are expected in a few days.

Herb W. Edwards Injured.

Herb W. Edwards of Des Moines lowa, got a fall on an ley walk last winter, spraining his wrist and bruising his knees. "The next day," he says, "they were so sore and stiff I was afraid I would have to stay in bed, but I rubbed them well with Chamberlain's Pain Balm and after a few applications all soreness had disappeared. I feel that this bottle of Pain Balm saved me several days' time, to say nothing of the suffering." This liniment is for J. OBERNDORFER, STOCK KER, 161 S. Main. Tel. Bell 792. sale by all leading druggists.

IS MUCH PLEASED WITH FRISCO CONTACT

Favorable Change Is Encountered in Shaft at the 400 Level.

After making an inspection of the Lub After making an inspection of the Lulu and Frisco Contact properties of Beaver, General Manager D. P. Robling, W. H. Tibbals and H. Richardson, the latter a leston investor, returned to the city during the day highly pleased with existing conditions. Speaking specifically of the Prisco Contact, Mr. Tibbals and that on the 400 level in the shaft, which had just been reached, a favorable change had been noted the ground being no longer hard, but giving the appearance of well mineralized vein matter.

Will Continue Sinking.

Manager Rohifing ordered the sinking to the 450 level, at which station cross-cutting will begin. A decision was also reached to resume work on the No. 2 shift and make connection between the

shift and make connection between the two workings.

Mr. Tibbals found conditions favorable throughout the district. He says that the Skylark is opening up a promising vein of copper. Leasers at the Majestic are getting out some profit-yielding ore and preparations are being made for a resumption of work on the Blackbird. The Lulu is now following the footwall, runwing a drift, and this formation will be thoroughly prospected before deciding upon the location of the permanent working shaft.

THE DAY ON 'CHANGE.

Light Trading Well Distributed and Lower Mammoth Advances.

Lower Mammoth Advances.

The day on the Salt Lake stock and mining exchange closed with the sessions showing the transfer of 23.43 shares havings we have gone fity-one feet into a body of are that will average 2 per cent copper. In the past six months in the two Ben Hur tunnels and the Montpeller tunnel we have opened not less than 25,00,000 tons on the porphisty side that will average 2 per cent copper. This is the information given to me directly by Manager L. S. Cates."

Makes Official Statement.

In view of the intense interest that has been aroused by the sudden rise in the shares of Boston Consolidated, which have in three weeks more than doubled in price and sold in Boston yesterday close to the 18 mark Mr. Newhouse hast night issued the following signed statement both to the local and Eastern press:

Urges Not to Sell.

The rapid increase in the market price of the shares of the Boston Consolidated Mary in the shares of the Boston Consolidated Mary in the past few weeks may impel some of our shareholders to part with their holdings. I feel it my dutty as president and general manager of the company to urge sbareholders to retain their shares even though the temptation to sell at a profit is strong.

Plans Rapidly Maturing.

BRC-

RICH STRIKE IN SPRUCEMONT MINE

Ohio Lead Mining & Smelting Company Is Opening Fine Body.

MANAGER MOATS TELLS OF PLANS FOR WORK

Eastern Syndicate That Has Taken Control Coming to Visit Property.

General Manager George L. Moats of the Ohio Lead Mining and Smelting comsany, operating the old Latham and other properties at Sprucement, south of Wells, Nevada, returned to the city during the day, after spending two months in the East in conference with his associates. Mr. Monts is enthusiastic over the outlook for the successful carrying forward of long-delayed plans for the installation of a plant at the mines and is confident that the difficulties of the management are now practically cleared away. Has Made Rich Strike.

A message from the mines received by Mr. Moats upon his return amounces the opening of a strong ore body on the 250 level, one foot of which carries the sensational values of 67½ per cent lead, 5 per cent copper and thirty-five ounces silver per ton, while the average for two and one-half feet of the vein is 52 per cent lead with the silver and copper as good as in the richer streak.

Will Hurry Big Tunnel.

Manager Monte is now engaged in perfecting arrangements for the installation of power drils to hasten work on the Juniper tunnel, which within sixty days will tap the ore bodies open above at a depth which will afford 500 feet of stoping ground. Development work will be pushed on the various claims during the winter and next season a smelting plant will be installed for the treatment of the ores, of which an immense quantity is now blocked out.

Easterners Coming.

Easterners Coming.

E. O. Black, president of the company, leaves Dayton, O., his home city, today, accompanied by half a dozen of his associates, who are heavily inferested, all of whom will make a trip to the property with Manager Moats, who will remain at the mine to direct the development. Of conditions in the East generally, Mr. Moats says that prosperity is the rule and that millions of dollars are ready for I tah. Nevada and other Western investments.

WORK ON BLUE RIDGE.

Much Activity Is Reported Since Strike Near Caliente. Special to The Trib-ine.

Special to The Tribune

CALLENTE, Nev. 2—George Pressler
and High McDonald, well-known mining
neer of San Francisco, passed through
Callente today, en route to Goldfield,
where they will at once put a force of
men to work on the newly discovered
flue Ridge group, from which assays running up to \$1500 have recently been taken
from a three-foot ledge of free gold
quartz. They are also leasers on two of
the best mines in Bullfrog and have made
upwards of a million dollars from their
leases during the past year

Taking Out Rich Ore.

Taking Out Rich Ore.

W. H. Shemwell, who sold the Scottish Chief mine, in Chief district, eight miles north of Callente, to Lawrence and associates of Salt Lake, is in town today and reports that work will be continued stoping out rich silver ore from tunnel run in in the ledge. Two carloads of this ore which have already been shipped to Salt Lake netted the owners over \$400 per carload.

Much Ground Located.

Much Ground Located.

J. H. Mangum of Callente has put nich to work on his Antelope canyon claim, and J. A. Denion is running a tunnel in the same district to cross-cut a ledge showing up values at croppings. Mr. Peer of Salt Lake and until recently an owner of rich claims in Irish mountain, is also doing location work on a big iron ledge showing free gold values in the same district, which lies two miles north of Callente. Nearly all the ground bordering the canyon has been recently located and work is being done on all these claims. Some very rich float has been discovered all around Callente, and while the country was prospected before the advent of the Salt Lake railroad many claims going into shipping values by rall were abanconed before shipping facilities were such as to make them pay propositions, and these claims are now being located and opened up by local miners.

Completing Their Titles.

Completing Their Titles.

Hans Olsen, one of the owners in the Western Addition to Caliente and of sevreal mining citims near the camp, went to Carsor to day to complete title to the land, which will be put on the market within the next thirty days. He is accompanied by H. A. McNamee, attorney for the Bambe ger-Deimar Mining company, who is also part owner in the land.

ANNIE LAURIE READY TO INCREASE OUTPUT

Additional Equipment for Plant Goes Into Commission This Week.

Manager Levy of the Annie Laurie minow the leading producer of the Gold Mountain country, who is up from camp or a day or two to confer with local interests, said doring the day that the new dryers for the milling plant would be ready to go into commission today. This will enable the mine to increase its ton-nage to 300 failty, a record that it is ex-pected will be steadily a aintained. Mine in Fine Shape.

Mine in Fine Shape.

Of the property generally, Manager Levy says that it is in first class condition. The equipment recently put into complexion is entirely satisfactory, and while it has never been the policy of the company to release definite information as to its earnings, it is not doubted among those well posted that another big bonch of bread money will be soon distributed. Mr. Levy reports the district generally active both in development work and prospecting.

LAWSON REPORTED SHORT.

Frenzied Finance King May Be Caught by Utah Con.

Advices received from Boston last night stated that Thomas W Lawson, whose articles on Frenzied Finance have given him world-wide notoclety, was short 10,000 shares on Utah Consolidated and his enemy, Henry Rogers, was planning to squeeze him and inflict a heavy loss. As no one posted on Bingham stocks predicts anything but an advance in price, the experience of Lawson may add another interesting chapter to bis financial autobiography.

FABULOUSLY RICH ORE.

Secrecy Is Maintained Concerning Strike by Reno Man.

II. B. Whos, the well-known mining man-cause in vesterday from the Pyrainbil mining district, says the Rene Journal. Mr. Winn brought some familiarily ich are with him. It is from a new find in the district and as-says in the neighborhood of \$3,000 per too. Gold can be seen in large chanks in almost NF, When will not discuss the find to and xtent beyond stating it is from what has restofare been unexplored ground. The work f staking but claims is now in progress.

Comstock Improves.

Speaks Well of Nevada.

Lew Humphrey, who is in the city from Bullfrag, where he has attained success in his pursuit of fortime, speaks in his pursuit of fortime, speaks in high terms of the future of that region and believes that many claims now only prospects will be added to the list of active producers before another season ends.

Ore and Bullion.

One and builton nettlements during the day smounted to \$54.700. McCornick & Cu. reporting them as they follow: Gold, silver, lead and copper sizes, \$22.900; hore builton, \$21.800. In the metal market silver remained at \$22, white per counce casting copper sold at 175, cents per pound and lead was unchanged, at \$4.80 and \$3.50 per hundred weight.

Situation Unchanged.

There was practically no change in the coke altuation, according to reports of smelter managers during the day. A small amount of coke continues to come from Colorado, but not cooking to prevent the plants from drawing on their small reserve supply.

Mining Notes.

Joseph L. Giroux, president of the Giroux busolidated. Ely. Nex., is in the city. C. H. Doollitle, manager of the Binghar nd New Haven, is scheduled to reach her rom New York tomorrow.

from New York tomorrow.

Charles D. Banks of American Fork, who is operating in American Fork caniyon, reports that district as unusually active.

Manager McIntyre of the Mammoth says the new strike in that Tinte property is holding well and that some of the ore will be added to the next regular shipment. At the Taylor-Brunton sampler were re-ceived during the day two cars of ore fro-Bingham, four cars from Tintic, one car froi Fish Springs and two cars from Nevada.

The Pioneer sampler resterday reported the eccipt of three cars of one from Tintic, two cars from Bingham and two cars from Alta. John A. Taff of the United States geological survey, is in the city. He has been assist-ing in the making of a topographical range of that section which will furnish valuable date as to mineral formation.

The Goldfield News reports the opening of a fine body of one in the Mayne Goldfield com-any's properties. In which former Manage Mayne of the Sandstorm and Messes, Fried man and Brackin of Minnesons are interested A strike of \$10 ore is reported in the Mour ain Chief mine of Little Cottonwood, which is being developed under the hanngement of Fred L. Price. The mine is now sending som
